The Collector

The CollectionistX

Community

Information sharing and exchange ideas about collections.
This could be done through events, social media and [DAO](#).

Education

Provide educational resources for collectors to learn about the project's value and their vision.
This include articles and videos published on the dapp.

Special Events

Organize special events for collectors to attend (auctions and conventions).
Provide opportunities to meet other collectors, learn about new items and expand their collections.
Bring more visibility to The CollectionistX and MultiversX blockchains.

Discounts

Negotiate discounts with projects and retailers for our members to help them acquire items for their collections at a lower cost.

Private Marketplace

An online marketplace where members can buy, which allow them to expand their collections and acquire rare items.

Help our members build the wallet of their dreams and
fostering a community of like-minded collectors.

How?

Engage with the community by responding to comments and questions.
Hosting AMAs (ask me anything) and providing regular updates on the ecosystem's progress.

Provide airdrops, staking rewards and other token-based rewards.
To encourage members to hold onto their \$TCX tokens which will increase demand and, ultimately, the value of the tokens.
The CollectionistX token \$TCX will be deflationary (1% burn for each mint or swap)

Collaborate with other projects in the blockchain space to increase exposure and expand.
Partnering with other projects, leverage the audiences to attract new members to the CollectionistX.

Like an idea that grows, you're not just a member but a part of the idea.
The MadCock NFT will serve as a key to the [dapp](#).

ectionistX

Transparency is an important principle

Transparency is an important aspect of any blockchain project.

Blockchain technology is designed to be transparent by nature, meaning that all transactions and data stored on the blockchain are publicly visible and cannot be altered once recorded.

Many NFT projects have taken the MultiversX member's funds through the 2021-2023 Bullrun and Bearmarket.

Governance mechanisms to manage decision-making and ensure that the project is operating in the best interests of its member's stakeholders and investors.

All actions or decisions will be taken through the **DAO**. (decentralized autonomous organization)

All CollectionistX wallets

@thecollectionist

Total eGLD from sales + 20% Restake & Airdrop \$TCX token to Madcock Holders

@thecollectionistxtreasury

10% eGLD staking rewards + Royalties & 14% \$TCX token after swapping or minting

@thecollectionistxburn

1% of the \$TCX token after swapping or minting will be burned.

@thecollectionistxbuy

40% eGLD staking rewards, investing in existing and new projects. (placed on the dapp for members)

@thecollectionistxlp

25% eGLD staking rewards & 21% \$TCX token after swapping or minting

@thecollectionistxlpreward

26% \$TCX token after swapping or minting

@thecollectionistxdevmark

5% eGLD staking rewards (development of The CollectionistX project)

17% eGLD staking rewards treasury (development and marketing of The CollectionistX project)

The Collectionist^x

The Collectionist^x creator's biography

In **crypto** since 2017

Invested in **Elrond** erd token 2018

SJ-Insomnia and **SJI Token**,
a wear brand for the Multivers^x network, was established in 2020.
This activity has slowed down as a result of his generosity to others.

Wears is typically sent as gifts or at the cost paid for them (wear + shipping).

MaiarBadges SFT and **Multivers^xBadges** creation Oct 2021 - present
He decided to ask the Multivers^x team to use the Maiar Badges and produce them as an NFT in their wallets based on the advice of many Multivers^x friends.
He created a hotpress flex of each badge on a tissue because he didn't want simply a illustration version of the Maiar Badges.

One of the **first SFT collections** built on the Multivers^x blockchain with a hexadecimal transaction.
He assumed that every Multivers^x members would want one, so he made it cheap, in a large quantity, and with eGLD prizes for sold-out badges.
(0.0025 eGLD | \$0.50 - 0.0125 eGLD | \$2.50 at the time of \$180 eGLD)

This was a **mistake** because there were no million users at the time on the Multivers^x blockchain and not everyone wanted one.
Several members gossiped about him copying the Multivers^x team art, while others blamed many badges.

As a result, he decided to **offer the project to the community** and burned 95% of the supplies.
Through giveaways, every eGLD sold will be returned to lucky badge holders.
<https://maiarbadges.exchange>

Despite his mistakes, he has gained knowledge of **token economics coding** and **web design**.
Assisted several small projects in developing their NFT or Token,
including one of the most well-known **QoWatt**.
<https://qowatt.network>

The CollectionistX NFT collection

It's exciting to be at the beginning of a journey, whether personal, professional, or creative. Remember that the journey is just as important as the destination.

Enjoy the process and embrace the lessons and experiences that come your way.

MadCock NFT

Name	Collection	Supply	Voting Power
MadCock	MADC-d03f58	10.000 NFTs	1 NFT / 1 Power

Utility & Benefits

Access to the dapp

MadCock NFT holders can access the dapp through the Xportal wallet.

\$TCX token airdrops (only for wallets)

Many of us need help follow each project 24/7 completely. Airdrop is a fantastic method to oversee your rewards.

Voting power

When it comes to voting every, MadCock is equal.

Viewing recorded meetings with projects

Interaction with projects will be recorded and published on the dapp.

Mint & Swap on the dapp (\$TCX token)

Investing with a part of eGLD rewards in existing and new projects.

All receive and purchase projects will be placed to Mint or Swap (available for purchase with \$TCX token).

NFT Royalties

Secondary market sales will be deposited to the treasury wallet.

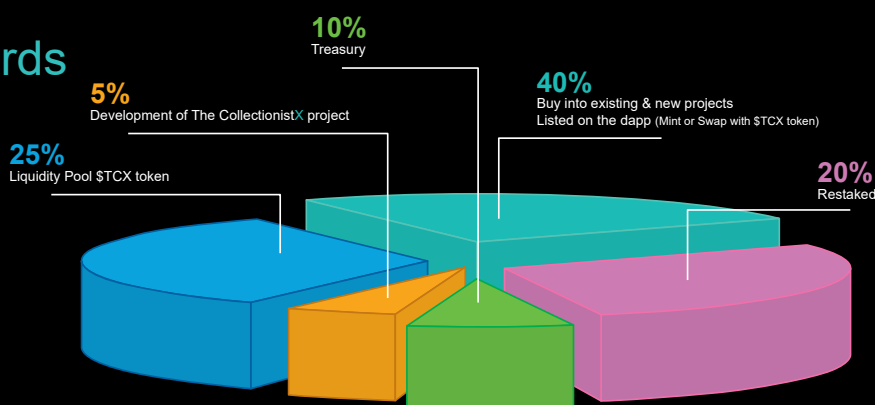

MadCock NFTs sales

Every milestone we reach results in a 20% price increase in the initial mint of the MadCock NFT on xoxno.com

The entire amount of eGLD gathered will be staked rather than sold or used to fund other projects. The CollectionistX project staking rewards are distributed at multiple levels.

eGLD staking rewards

- 40% Buy
- 25% Liquidity Pool
- 20% Restake
- 10% Treasury
- 5% Development

The CollectionistX token

Creating a token that delivers value to its members investors and achieves its intended goals.

The way token is created, distributed, used, and valued in the ecosystem.
A well-designed token economics model can ensure that the \$TCX token is used for its intended purpose, creates demand, and retains value over time.

\$TCX token

Name	Ticker	Supply	Decimals
TheCollectionistX	TCX-8d448d	8.888.888	8

Utility & Benefits

Token supply

The maximum supply \$TCX tokens are fixed at 8.888.888.
They only are distributed by airdrops to MadCock NFT holders every week.

\$TCX airdrops (only for wallets)

Sit back, relax, and watch your wallet rise.
Snapshot: Sunday 10am UTC +0 | Airdrops: every Monday.
Your MadCock NFT ranking determines rewards.

Rank	Daily Rewards	Weekly Rewards
1 - 8	3 \$TCX	21 \$TCX
9 - 1500	1.125 \$TCX	7.875 \$TCX
1501 - 3000	0.75 \$TCX	5.25 \$TCX
3001 - 5000	0.5 \$TCX	3.5 \$TCX
5001 - 7000	0.25 \$TCX	1.75 \$TCX
7001 - 10000	0.15 \$TCX	1.05 \$TCX

Token utility

The token can be used within the ecosystem such as for minting, swapping, and staking on The CollectionistX dapp and provides liquidity on the Xexchange.

Value

The factors that affect the value of the \$TCX limited supply create higher demand incentives scarcity by a deflationary mechanism and provides utility.

Distribution

The total supply will be airdropped over 62 months period to the MadCock NFT holders.
\$TCX are distributed to MadCock NFT holders, stakeholders, and liquidity providers.

Economics incentives

\$TCX token can be used on the dapp to purchase a listed NFT, token, or items.
Provide members with a staking contract.
Create a liquidity Pool on the Xexchange.

Reduce supply

1% of the \$TCX token after swapping or minting will be burned.

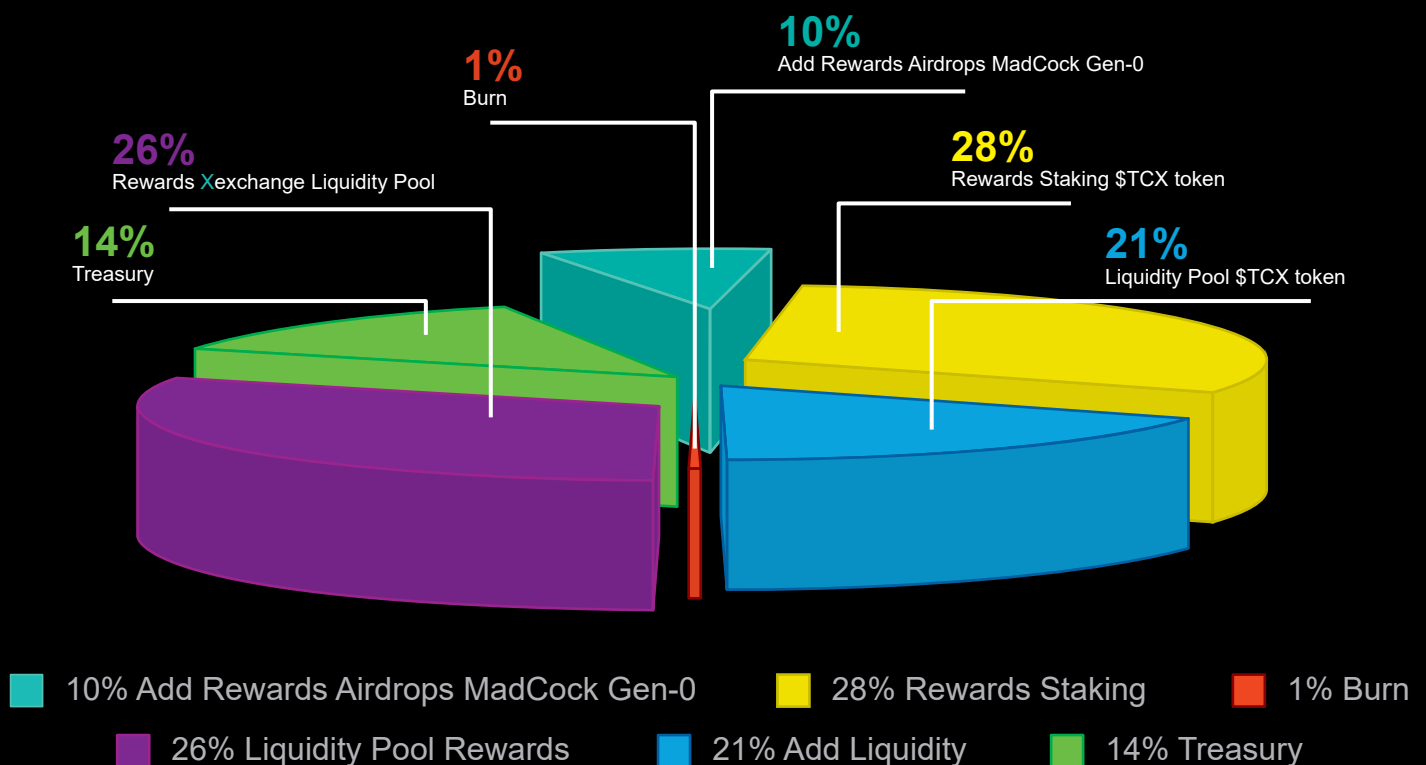

Staking

The CollectionistX dapp offers a staking contract.
28% of the \$TCX token after exchanging or minting will be distributed to the stakeholders.

Distribution of \$TCX token (after mint & swap)

The distribution is critical in establishing the value and adoption of \$TCX tokens.

The CollectionistX carefully reviews the distribution strategies to preserve a sustainable and beneficial ecosystem for all participants.

The CollectionistX Treasury

Treasury is a project division in The CollectionistX responsible for overseeing economic growth stability and awareness.

The primary functions of a treasury will be to ensuring:

- Steadily rise in the price of MadCock NFT and \$TCX token.
- Funds to organize special events for collectors to attend.
- Build a brand name and bring more visibility on to MultiversX blockchain.

The activities of a treasury can have a significant impact on the overall health of The CollectionistX project as well as on the well-being of participants.

Funds

Treasury will be created from scratch. More information on the development of the treasury allocation: MadCock NFT and \$TCX section.

Additionally, MadCock sales on the secondary market will generate royalties that will be placed into the treasury.

Each and every eGLD will be staked.

Benefits

MadCock NFT

Increases the selling price of MadCock NFT over time.

\$TCX token

Raises the price of \$TCX token over time.

New sources of revenue

Find and allocate funds to generate secondary revenue streams for members.

(Xexchange, Proteo, QuantumX, etc.)

Events

Gather, all of the collectors, together to share new ideas, opportunities and to form a strong bond.

Marketing

Bring in new members by collaborating with established projects and brands.

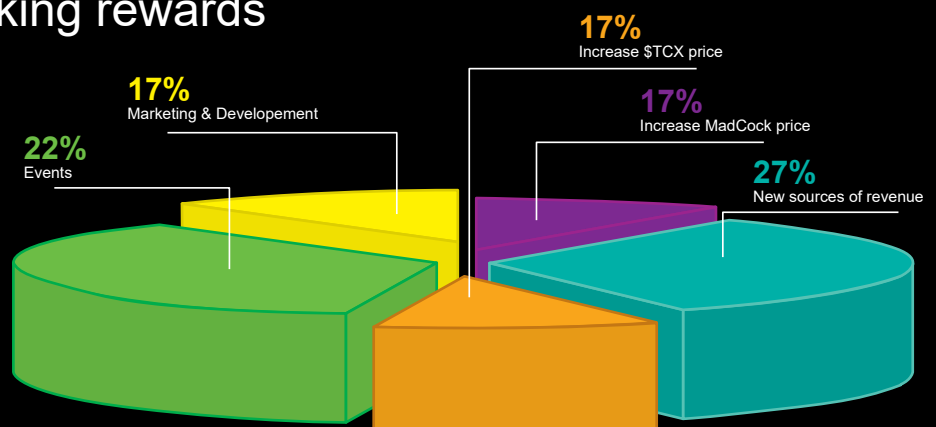

Increase visibility on the MultiversX blockchain.

Development

Funds for the deployment of futures and new coworkers into the project.

Distribution of eGLD staking rewards

- 27% New sources of revenue
- 22% Events
- 17% Increase MadCock price
- 17% Increase \$TCX price
- 17% Marketing & Development

The CollectionistX dapp

The CollectionistX decentralized application is a software application that will operate on the MultiversX network. Unlike traditional applications that rely on a centralized server or authority to function, it runs on a distributed network of nodes, making them more secure, transparent, and resistant to censorship.

Only MultiversX wallets with a MadCock NFT can access the dapp.

DAO (decentralized autonomous organization)

Governance mechanisms to manage decision-making and ensure that the project is operating in the best interests of its member's stakeholders and investors. All actions or decisions will be taken through the DAO.

Staking \$TCX

Members can add \$TCX tokens thanks to a staking contract.

The stakeholders will receive 28% of the \$TCX token from swapping or minting.

Swap & Mint

Access to a private swap and mint platform where only a \$TCX token can be used as payment for any partner's gifts or purchases made by The CollectionistX. (NFTs, tokens, and items)

Video meeting

Every interaction we have with projects will be recorded and added to the dapp.

Build and promote other projects

Build

Help building projects

Payment in eGLD or Usdt

- 20% added to @TheCollectionist wallet (Madcock Sales)
- 20% will be given as an airdrop to Madcock NFT holders.
- 60% added to @TheCollectionistxdevmark wallet.

Promote

Advertise projects on social media: Twitter, Telegram, Discord, and Youtube

Payment in eGLD or Usdt

- 50% added to @TheCollectionist wallet (Madcock Sales)
- 50% will be given as an airdrop to Madcock NFT holders.

Be among the first to discover, vote and decide whether the project is accepted or rejected through the DAO.

Partnerships

We share a common vision, goals, and values.

Key characteristics of great partnership

Complementary Skills

Complement each other by successfully dividing and conquering assignments.

Clear Communication

A successful collaboration involves clear communication and an open sharing of ideas.

Trust

In any successful collaboration, trust is crucial. Partners must be able to rely on one another while acting in the best interests of members and investors.

Defined Roles and Responsibilities

To minimize misunderstandings and confrontations, clearly identify their roles and responsibilities.

Flexibility

Be open to new ideas and solutions and be able to adapt to changing circumstances.

Respect

Mutual respect's opinions, ideas, and contributions to the project are required.

Committed Long-term

Committed Long-term It requires a long-term commitment to the project and one another.

By developing these attributes,
an excellent collaboration may be built, which will ultimately drive the project's success.

Identify potential partners

Evaluate the potential partner

Before proposing a partnership, research the potential partner.
Consider their reputation, track record, values, and other relevant information.

Start the conversation

Reach out to the potential partner and initiate a conversation.

Discuss partnership goals and expectations

Goals and expectations for the partnership, including the division of responsibilities, revenue sharing, and other important details, will be discussed.
A clear understanding of the expectations and capabilities of each party.

Establish a formal agreement

Once both parties have agreed on the terms of the partnership, establish a formal agreement outlining the details of the partnership.
The agreement should include the responsibilities of each and any other relevant information.

Open communication

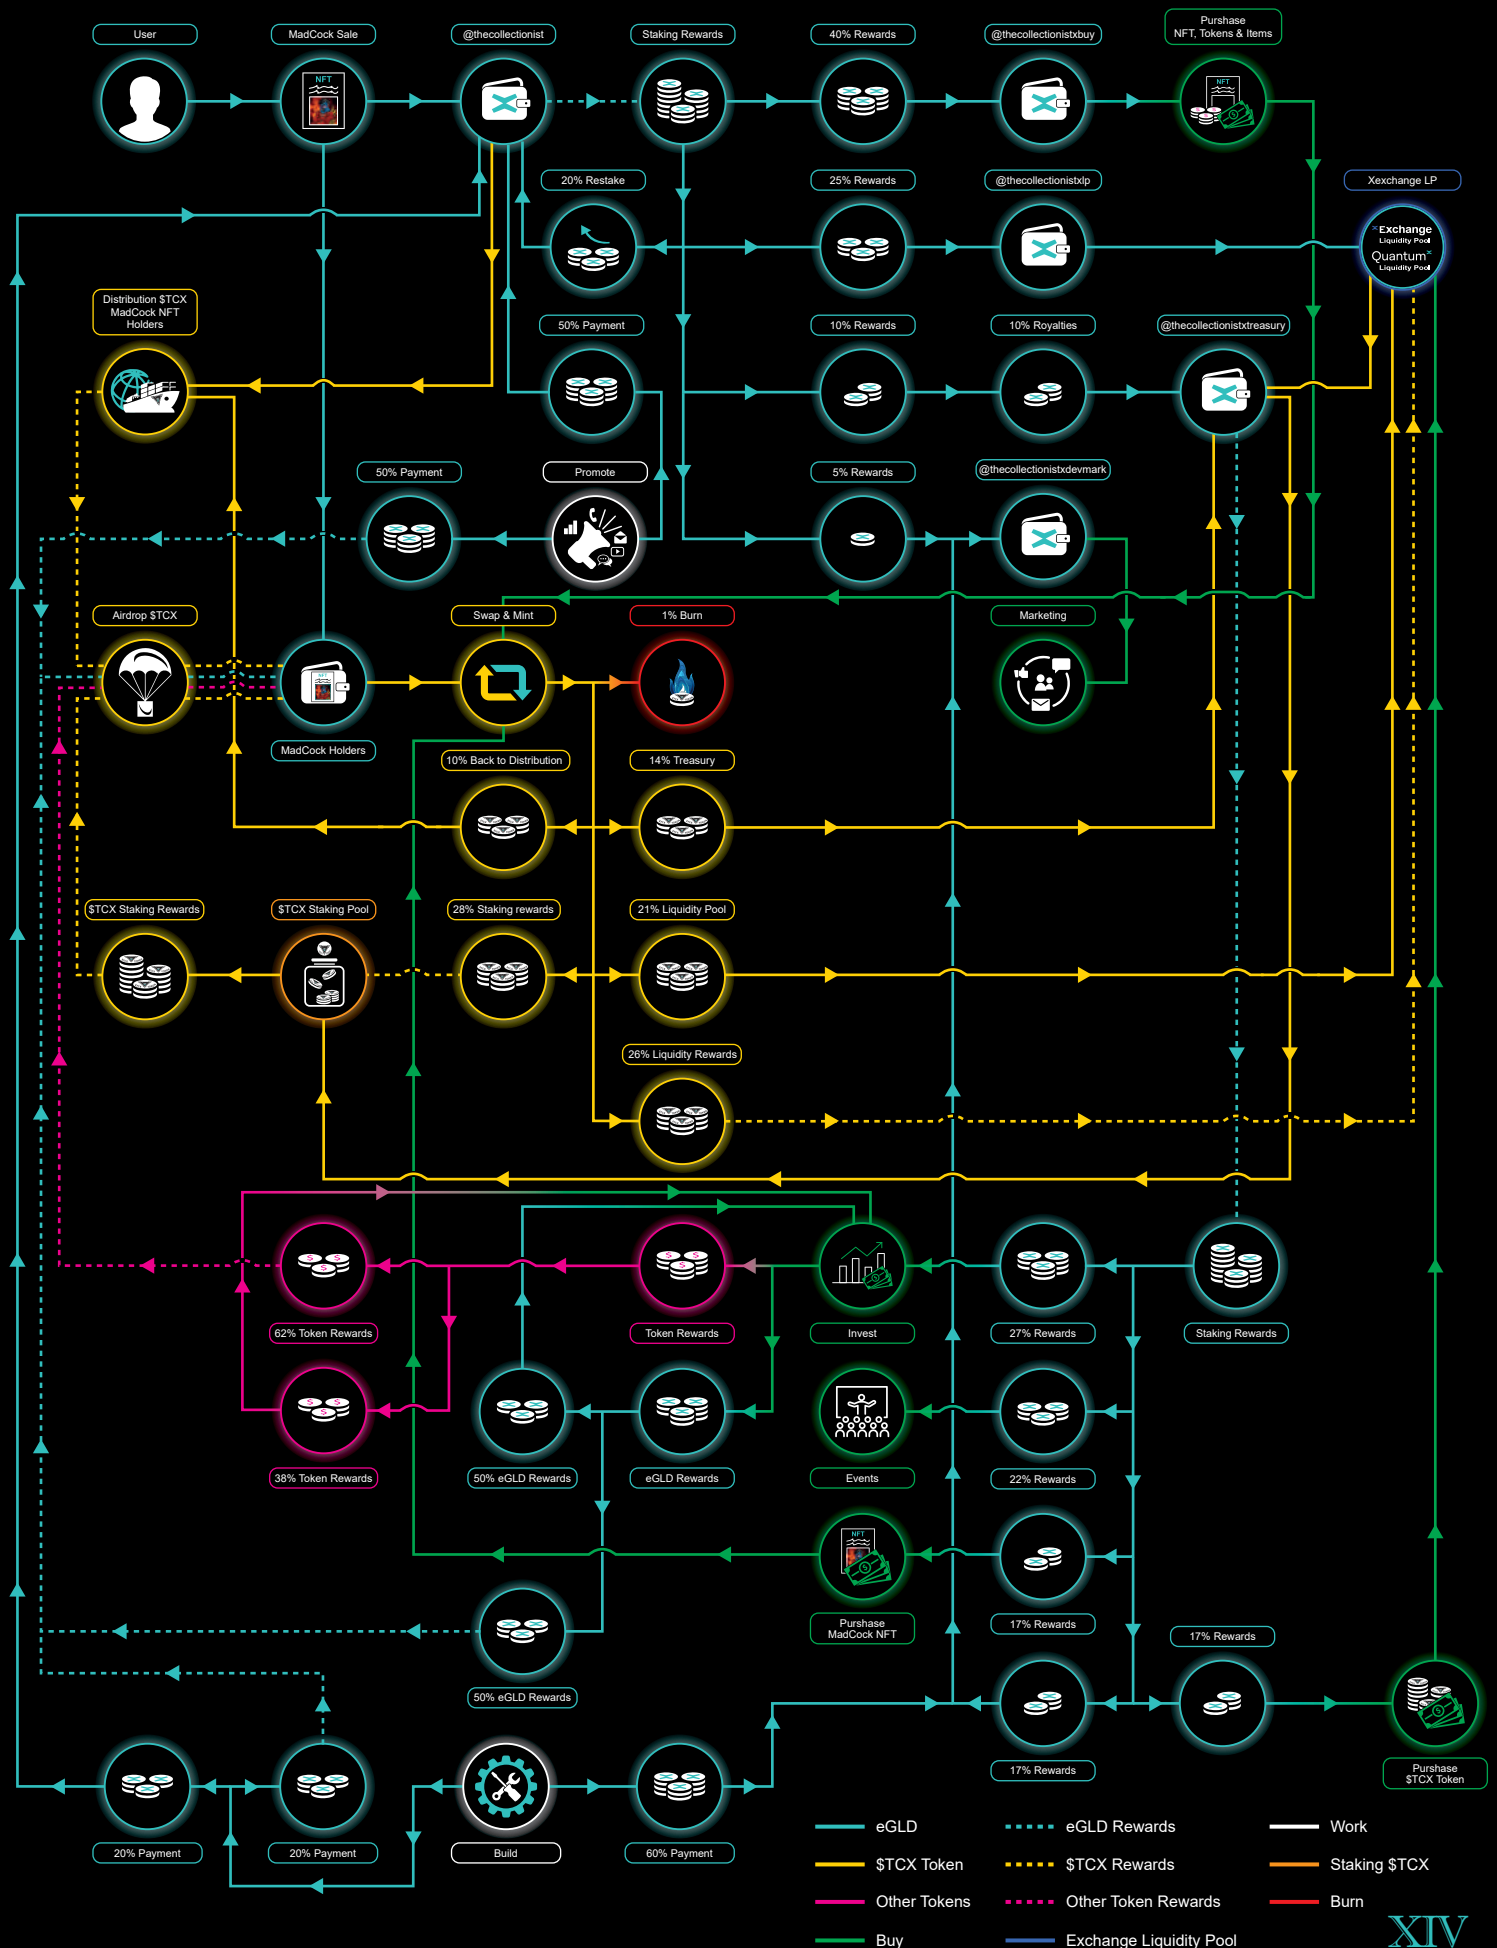

Ongoing communication and collaboration.
Established active communication methods and meetings to ensure that both parties are on the same path and working toward the same objectives.

Foster the relationship

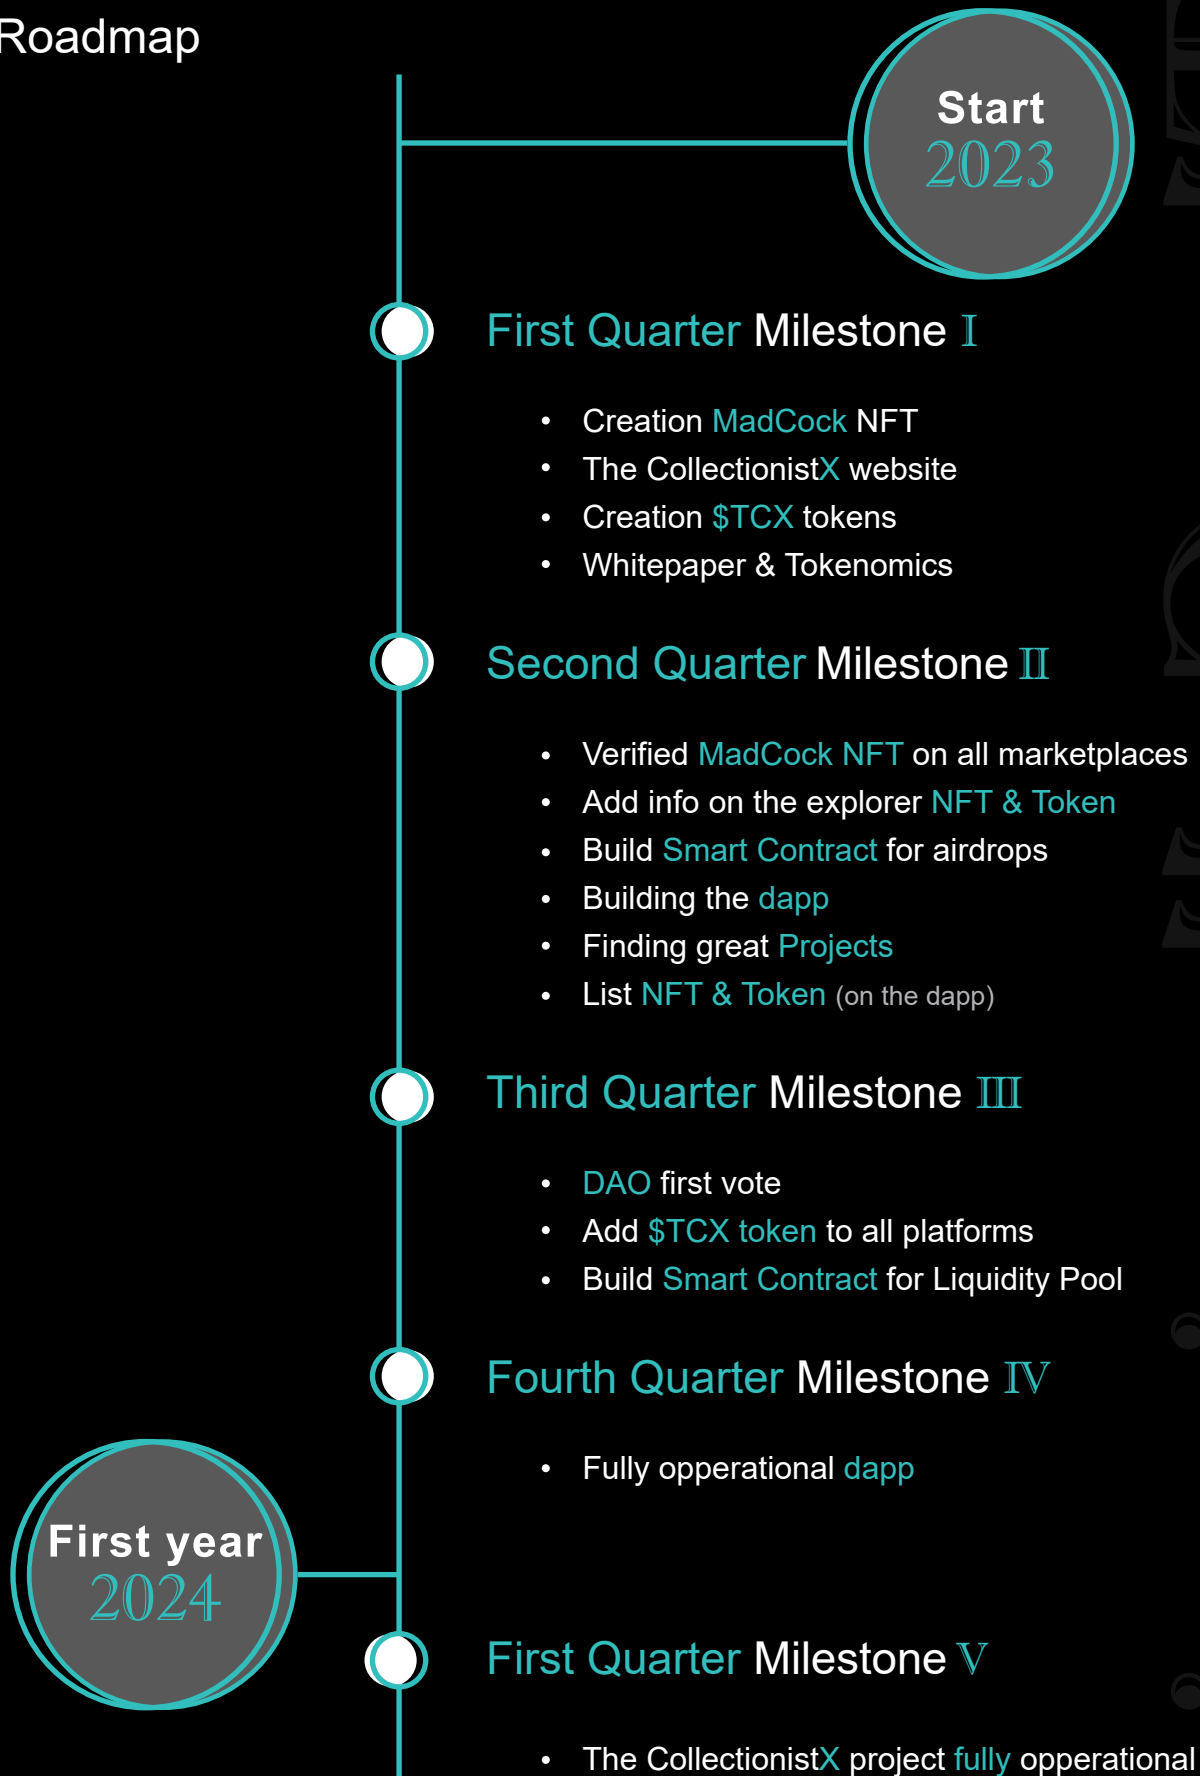

Developing excellent working relationships with partners.
Appreciate victories, learn from setbacks, and strive to enhance the collaboration.

To succeed, continuous work and commitment are essential.

The CollectoristX Model

Roadmap

Every milestone we reach results in a **20% price increase** in the initial mint of the MadCock NFT on xoxno.com
